

KNOTWEEDS

Polygonum spp.

PERENNIAL LIFECYCLE & TREATMENT TIMING

mda.state.mn.us/weedcontrol

FOLIAR SPRAY

Spray when plant is flowering.

CUT AND TREAT

Cut stem at base and apply herbicide.

DIGGING

Remove rhizomes multiple times per year.

SMOTHERING

Cover with tarp to temporarily suppress growth.

GRAZING

Cattle, goats or sheep eat foliage and stems.

Monitoring and repeated management is necessary for long term control of established infestations.
